```c
/*12. Demonstrate how to read data from the keyboard, write it to a file called BMSCE.txt,again read the same data from the BMSCE file,
#include<stdio.h>
int main()
{
    char feedback[40];
    FILE *fp;
    fp=fopen("BMSCE.txt","w");
    printf("Write something about BMSCE\n");
    fgets(feedback,200,stdin);
    fputs(feedback,fp);
    fclose(fp);
    fp=fopen("BMSCE.txt","r");
    printf("Data read from the file:\n");
    while(fgets(feedback,200,fp) != NULL)
    {
        printf("%s",feedback);
    }
    return 0;
}
```

```
Write something about BMSCE
bmsce is a great college
Data read from the file:
bmsce is a great college
